

PARKING AND PLANNING PROJECTS

Mayo Clinic Employee Ramp, Block No. 40 - Rochester, Minnesota

OWNER

Mayo Clinic - Rochester, Minnesota

**PARKING CONSULTANT /
FUNCTIONAL DESIGN**

Walker Parking Consultants

ARCHITECTURAL CONCEPT

Albersman & Armstrong, Ltd.

This proposed two bay, eight level parking structure located in Rochester, Minnesota will serve employees of the world famous Mayo Clinic. The architecture is intentionally understated so that Clinic Patrons do not confuse the structure with the glass enclosed public parking facilities that are located within one and two blocks of the site. The precast panels are designed to hide the two sloping bays of the parking structure. This along with the lightly colored precast and clean lines of the stair/elevator tower provide an aesthetically pleasing facade that fits in nicely with it's surroundings and the existing precast clad employee parking facility located just across the street.
