

PARKING AND PLANNING PROJECTS

University of the Incarnate Word - San Antonio, Texas

The University of the Incarnate Word located in San Antonio, Texas is in the process of expanding its campus facilities. Included in this expansion is a nine level, 750 stall parking facility with over 280,000 square feet of parking space.

Working as a subconsultant to Marmon Mok an architectural firm in San Antonio, Albersman & Armstrong, Ltd. assisted with the functional design of the parking structure. The challenge is to get parking patrons into and out of the nine level facility in a timely manner especially since the garage will also be used for event parking.

The solution lies in a double-thread, one way flow garage with crossovers at every other level that will cut normal exiting time virtually in half.

Architectural features include an attractive screened exterior with brick accents that fit into the existing campus surroundings.
